

HOW TO MEASURE

WE'VE GOT YOU COVERED.

Have you ever considered why your size changes with the brands you wear?

Have you ever considered how a shirt is made?

STEP 1

CHOOSE YOUR FAVOURITE FITTING SHIRT

Get your favourite fitting Polo Shirt, Tee Shirt or Singlet and grab a tape measure or ruler.

TIP: don't get a button up shirt because they don't stretch as much as a knit does.

STEP TWO

LAY IT DOWN ON A FLAT SURFACE

with the arms extended and smooth it flat.

TIP: make sure no-one is wearing it.

STEP THREE

MEASURE DOWN 2.5CM

from where the arm is sewn onto the body, give yourself a 'mark'.

TIP: don't use a pen or marker, just make a light indentation in the fabric with your fingernail.

STEP FOUR

HALF CHEST MEASUREMENT

Use this 'mark' you've just made and then measure across the front of the shirt from seam to seam.

TIP: only measure the front, that's why it's called a half chest measurement.

STEP FIVE

SIZING TABLES IN THIS CATALOGUE

or On-Line www.aussiepacific.com.au to match your half chest measurement to the Sizing Table.

TIP: do the measure up more than once in case you misread the numbers.

STEP SIX

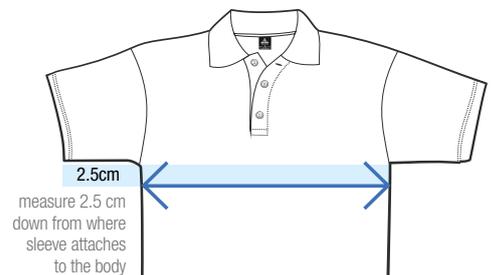

COMPARE AND THINK

Let's say, after measuring, you find your half chest measurement is 58cm then go to the shirt style you are going to choose and associate that cm measurement to the size of the shirt, so for example a Eureka Polo Size L has a 58cm half chest.

TIP: Measure a couple of times

TIP: If you come in at 59cm, then consider going to an XL at 60.5cm

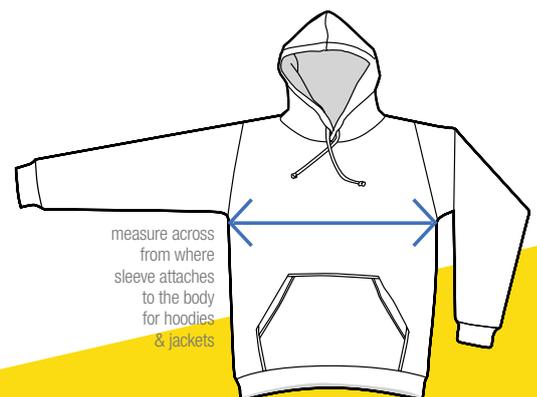

TIP: it's not mass produced by large automatic machinery. Our garments are carefully crafted by hand. That's why all Aussie Pacific garments have a sizing tolerance of between +/- 1-2cm.

HALF CHEST MEASUREMENT

PLEASE NOTE:

ALL GARMENTS ARE MADE BY HAND AND MAY HAVE VARIATIONS +/- 1-2cm (guide only)
